

Proximal Socket Limited (PSL)
RC 1352966

Date: _____

Dear Sir/Madam,

We are pleased to present **EduSocket**, an indigenous School Management ERP developed by PSL, for consideration by your institution.

EduSocket was designed in response to the growing need for schools in Nigeria to digitize academic and administrative operations without compromising their existing policies, grading systems, and institutional identity. Unlike many foreign or rigid platforms, EduSocket respects how Nigerian schools operate and simply enhances efficiency through technology.

This proposal outlines how EduSocket can support schools in improving result processing, examinations, attendance, record keeping, and overall academic administration – while allowing school management to remain fully in control.

We look forward to the opportunity of partnering with your institution in advancing academic excellence through a reliable, locally supported digital solution.

Thank you for your time and consideration.

Yours faithfully,
Okodeh Ogaga Samuel
President, PSL-Edusocket.

PROPOSAL FOR THE DEPLOYMENT OF EDUSOCKET

An Indigenous School Management ERP Solution

1. Introduction

EduSocket is a comprehensive School Management Enterprise Resource Planning (ERP) system developed to meet the academic, administrative, and operational realities of Nigerian schools.

It is designed to help schools transition from manual or fragmented systems into a centralized, secure, and flexible digital platform, without enforcing foreign structures or disrupting established practices.

2. Rationale for Digital School Management

Schools today face increasing demands for accuracy, transparency, and efficiency. Manual processes and disconnected tools often result in:

- Errors in result computation

Proximal Intel

- Delays in report generation
- Excessive paperwork
- Difficulty managing large student populations
- Stress on teachers and administrators

While many digital solutions exist, most impose rigid grading systems and workflows that do not reflect local educational practices.

3. EduSocket: The Proposed Solution

EduSocket is proposed as a school-controlled digital management system that automates operations while preserving institutional autonomy.

Core Philosophy

The school defines the rules. EduSocket implements them digitally.

4. Key Objectives

The deployment of EduSocket aims to:

1. Digitize academic and administrative processes
2. Improve accuracy and speed of result processing
3. Reduce administrative workload and errors
4. Enhance transparency and record keeping
5. Provide scalable technology suitable for schools of all sizes
6. Offer dependable local technical support

5. Scope of EduSocket Modules

5.1 Result Processing

- Flexible grading systems
- Broadsheets, report cards, and transcripts
- Termly and cumulative performance analysis
- Configurable to match school policies

5.2 Computer-Based Testing (CBT)

- Secure and customizable examinations
- Automatic marking and instant results
- Performance analytics

5.3 Notes & Learning Management

- Digital lesson notes
- Assignments and submissions
- Academic content organization

5.4 Attendance Management (*Optional*)

- Student attendance tracking
- Class-based and term-based reports

5.5 Fees Management (*Optional*)

- Student fee records
- Payment tracking and summaries

5.6 Website & Communication (*Optional*)

- Official school website
- Newsletters and announcements

6. User Roles & Access Control

EduSocket supports role-based access to ensure security and accountability:

- Administrators: Full control of system configuration and data
- Teachers: Academic management, result entry, CBT setup
- Students: Secure access to results, assignments, and exams

7. Implementation & Onboarding

Deployment follows a structured process:

1. School registration and approval
2. System configuration based on school policies
3. Creation of user accounts
4. Orientation and onboarding
5. Continuous technical support

The system is configured to reflect the school's existing academic structure.

8. Subscription Plans

EduSocket operates on a flexible monthly subscription model:

Plan	Monthly Cost	Features
<i>Freemium</i>	0	Up to 50 students, Result Processing, Broadsheet
<i>Basic</i>	5000	Unlimited students, core modules
<i>Dove</i>	8000	Includes CBT
<i>Hawk</i>	12000	CBT + School Website
<i>Falcon</i>	20000	Attendance, Library, Newsletters
<i>Eagle</i>	30000	Includes Fees Management

Schools may upgrade, downgrade, or activate modules at any time.

9. Benefits to Schools

By adopting EduSocket, schools benefit from:

- Full control over academic and administrative processes
- Faster and more accurate result processing
- Reduced paperwork and administrative stress
- Improved transparency and accountability
- Scalable technology that grows with the school
- Reliable local technical support

10. Support & Maintenance

Proximal Socket provides:

- Dedicated local support
- Prompt system updates
- Policy-aligned system configuration
- Continuous improvement based on school feedback

11. Conclusion

EduSocket is a practical, affordable, and future-ready solution for schools seeking to modernize operations without compromising their identity or autonomy.

We invite your institution to partner with Proximal Socket in transforming school management through technology that understands the Nigerian education system.
